

GMC IGNITION LOCKS

General information as follows:

1. For applications before 1967 (B10 & B11 keys) see the separate section.
2. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
3. Unless specified otherwise all locks using single sided keys GM-A through GM-K have universal groove that will accept all 8 keyway variations. These locks will not accept the pre-1967 B10/B11 keys.
4. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
5. GM used several different manufacturers for locks using double sided keys. Replacement locks sold by GM dealers for a specific year and model may not be made by the same manufacturer as the lock originally installed on the car when it was built. The different manufacturers tumblers may not interchange, but the assembled lock will work as a replacement when the correct tumblers are used. Also the turn knob may vary slightly in appearance from the lock originally installed on the car. In preparation of this application chart we cross referenced the original GM parts information that is available to us to try to be as accurate as possible and to simplify coverage as much as possible while preserving accuracy.

Model	Years	Key	Part description	Part no.	Part description	Part no.	Notes
Most models	1946-66	B10	Coded cylinder	LC1420	Uncoded cylinder	LC1420U (DWO)	Use tumbler series P-41-101/105
4000-7000 Medium duty In-dash ignition	1967-92	GMA/K	Coded cylinder	LC1422	Uncoded cylinder	LC1422U	Use tumbler series P-41-101/105
4000-7000 (Medium Duty)	1993-94	GMA/K	Coded cylinder	LC1436	Uncoded cylinder	LC1436U	Use tumbler series P-41-101/105

Scroll down for tumbler and keying kit information

GMC IGNITION LOCKS

Which tumblers and keying kits to use:

The chart below lists which tumblers and keying kits to use according to which key blank the lock uses.

General Motors is different from most other car manufacturers because locks using the same keyway may use different tumblers depending upon who manufactured the lock and in some cases when it was manufactured. Also some replacement locks may use tumblers different from the lock installed on the car when it was built and which are not available from any known source. As such these tumbler references are correct only to the extent of information that is available to us.

To help avoid confusion, whenever possible the year and model section includes which tumbler series to use in the notes section.

Key Blank	Tumbler #1 depth	Tumbler #2 depth	Tumbler #3 depth	Tumbler #4 depth	Tumbler #5 depth	Keying kits and Notes
B10, B11	P-41-101 RP6038 322051	P-41-102 RP6039 322052	P-41-103 RP6040 322053	P-41-104 RP6041 322054	P-41-105 RP6042 322055	SK6035 keying kit supplied by ASP

Why use our C-23-112 ignition locks instead of an uncoded service pack that comes as a bag of loose parts with small packs of tumblers to use for assembly?

Scroll down for the answer

GMC IGNITION LOCKS

Why use our C-23-112 ignition locks instead of an uncoded service pack that comes as a bag of loose parts with small packs of tumblers to use for assembly?

Our locks are factory assembled and tested, so you know all of the parts are there. It takes only a few seconds to take an assembled lock apart for rekeying. There is no chance of missing parts unless you lose something yourself.

Our locks are also about 40% less expensive than those uncoded service packs. By using the tumblers from a keying kit instead of from the uncoded service pack the savings will add up for you. You can also reuse tumblers from the coded locks, or leftover tumblers from uncoded service packs that you may have used in the past.

And for even more savings:

High security ignition lock starter kit - part number A-23-103-A

Contains an A-23-103 keying kit plus 5 pieces of C-23-112 ignition locks at a additional cost saving compared to ordering the same parts separately.
